PROFESSIONAL SUMMARY

Full-Stack Engineer with comprehensive hands-on expertise in designing, architecting, and deploying scalable, enterprise-grade web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js) and Next.js. Proven record in developing high-throughput RESTful APIs, asynchronous event architectures, microservices, and secure JWT/OTP authentication workflows. Adept at engineering omnichannel communication tools, WhatsApp Business Cloud APIs, payment integrations (Razorpay), and cloud storage (AWS S3) while maintaining optimal frontend performance and 99.9% application uptime.

TECHNICAL SKILLS

- **Frontend Technologies:** React.js, Next.js, React Native (Expo), Redux Toolkit, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap 5
- **Backend Technologies:** Node.js, Express.js, RESTful APIs, Microservices, Python, Flask, WebSockets
- **Databases & Cloud:** MongoDB, PostgreSQL, Mongoose ODM, AWS S3, Vercel, Git, GitHub
- **Integrations & Security:** WhatsApp Business Cloud API, Razorpay Payment Gateway, JWT Auth, SMS/OTP Verification, RBAC

WORK EXPERIENCE

Full Stack Developer | AIVIQONE Technology Pvt. Ltd, Delhi (Remote)

Sep 2026 – Present

- Spearhead the end-to-end architecture and feature delivery for AIVIQONE's flagship SaaS platform, integrating omnichannel communication and enterprise CRM automation.
- Engineered robust WhatsApp Business Cloud API workflows and bi-directional WebSockets to facilitate real-time chat sync, automated bot triggers, and unified inbox management.
- Developed high-performance RESTful APIs and MongoDB aggregation pipelines for multi-tenant lead management, funnel stage analytics, and customer lifecycle tracking.
- Collaborate in a remote-first agile environment, optimizing database queries and backend microservices to achieve sub-100ms API response times across peak lead ingestion volumes.

MERN Stack Developer | Snow Fountain Consultants Pvt. Ltd., Lucknow, UP

Sep 2025 - Sep 2026

- Architected and maintained dynamic client-side interfaces and scalable backend microservices utilizing React.js, Node.js, Express.js, and MongoDB.
- Designed and optimized high-throughput RESTful APIs, streamlining data serialization and enhancing database indexing for fast query execution.
- Led code reviews, debugging sessions, and performance benchmarking to eliminate bottlenecks and maintain >99.9% application uptime.

- Developed modular, cross-browser responsive web applications adhering strictly to modern semantic HTML5, CSS3, and Bootstrap 5 guidelines.
- Collaborated with senior engineers to diagnose frontend UI bugs, enhance accessibility standards, and optimize mobile view rendering.

KEY PROJECTS

AIVIQONE – All-in-One CRM & Omnichannel Business Automation Platform [[Live Demo](#)]

Tech Stack: *React.js, Node.js, Express.js, MongoDB, WebSockets, WhatsApp Cloud API, REST APIs*

- Engineered a scalable omnichannel business suite consolidating multi-channel leads, contact books, dynamic sales pipelines, and customer journey tracking.
- Integrated official WhatsApp Cloud API, SMS gateways, and automated chat workflows, enabling continuous auto-replies and instant CRM ticket assignment.
- Implemented customizable role-based sales management dashboards providing actionable insights into conversion funnels, agent performance, and team KPIs.

GoDrive Self Drive – Car Rental & Instant Fleet Booking Portal [[Live Demo](#)]

Tech Stack: *React.js, Node.js, Express.js, MongoDB, Razorpay, REST APIs*

- Developed an end-to-end self-drive and chauffeur car rental platform featuring transparent vehicle category browsing (SUVs, sedans, luxury fleets).
- Engineered an instant dynamic fare calculator and online token reservation system with secure digital payment processing via Razorpay.
- Implemented a rapid 2-minute digital KYC verification pipeline allowing customers to securely upload Driving License and Govt ID documents with real-time verification.

SathiMeet – On-Demand Social & Lifestyle Support Services Platform [[Live Demo](#)]

Tech Stack: *React.js, Node.js, Express.js, MongoDB, JWT Auth, Geolocation APIs*

- Built a nationwide on-demand lifestyle and companion support services platform covering 700+ districts across India with multi-category booking workflows.
- Implemented verified partner onboarding, geo-location proximity matching, transparent hourly rate structures, and secure booking management.
- Architected a comprehensive role-based portal with separate user, verified partner, and admin moderation panels prioritizing safety and consent.

Lovely Gas Company – Digital Gas Distribution & Utility Management Portal [[Live Demo](#)]

Tech Stack: *React.js, Tailwind CSS, Node.js, Express.js, MongoDB, Vercel*

- Designed and deployed a responsive LPG cylinder booking and commercial gas utility service web portal with automated delivery scheduling.
- Created intuitive customer onboarding, online cylinder refill requests, real-time dispatch tracking, and consumer support ticketing modules.
- Optimized frontend performance, achieving a 95+ Google Lighthouse rating and ultra-fast initial page load times on low-bandwidth networks.

Mini Digi-Locker App – Role-Based Secure Document Management System

Tech Stack: *React Native (Expo), Node.js, Express.js, MongoDB, AWS S3, JWT*

- Architected a secure cross-platform mobile document vault utilizing React Native Expo and encrypted cloud storage on AWS S3.
- Engineered OTP-based mobile authentication and granular Role-Based Access Control (RBAC) separating Admin and User privileges.
- Created real-time document sharing with dual-factor OTP approval workflow, safeguarding sensitive user files from unauthorized distribution.

Full-Stack E-Commerce Platform with Payment Gateway

Tech Stack: *React.js, Node.js, Express.js, MongoDB, Razorpay API, Redux Toolkit*

- Built a full-featured e-commerce application with product filtering, category management, persistent shopping carts, and wishlists.
- Integrated Razorpay payment gateway API with webhook signature verification for automated payment processing and real-time order status updates.

EDUCATION

- **B.Tech in Computer Science & Engineering** — Rameshwaram Institute of Technology and Management, Lucknow, UP (2019 – 2023) | CGPA: 7.2
- **Intermediate (Class XII)** — S.P.N. Inter College, Tiloi, Amethi, UP (2018 – 2019) | Percentage: 61%
- **High School (Class X)** — S.P.N. Inter College, Tiloi, Amethi, UP (2017 – 2018) | Percentage: 72%

CERTIFICATIONS

- **Certified Full Stack Web Developer — Edureka**
Comprehensive specialization in MERN Stack, RESTful API architecture, Database schema design, and AWS S3 cloud deployment.
